

The Hydra Privacy Card® (Hydra PC™) Series II is a unique, multifunctional security device that combines the features of a USB security token and portable storage drive with the strongest encryption technology commercially available. Secure hardware-based encryption sets Hydra PC apart from other encryption solutions. FIPS 140-2 Level 3 security validated. The Hydra ViP edition includes virus and malware scanning capabilities. The Hydra PC is the only USB device approved by DoD with Suite B on Board.

WinMagic Inc. Provides the world's most secure full-disk encryption software that is easy to use, deploy, and manage. SecureDoc Enterprise Edition is a full-disk encryption software solution providing pre-boot and end-user authentication provisioned in a single factor, or multi factor fashion. SecureDoc protects data at rest for endpoint devices including desktops, notebooks, external USB drives, and CD/DVDs. Through full disk, file/folder, container and external media encryption as well as port and device control you can be sure your data is protected. SecureDoc is FIPS 140-2 and Common Criteria EAL 4 certified. Elytra is the exclusive partner on the Canadian Federal Government's NMSO with WinMagic.

MXI Security's portable security devices combine the power of secure storage (1GB to 500GB) with identity, encryption, and authentication services. MXI Security's New Access Enterprise suite allows for centralized management, user configuration, key recovery and application support. Biometric and/or password authentication with full token support. Available on the McAfee DISO with Mal-ware scanning included.

The PC-over-IP solution allows customers to have the best possible user experience over a traditional IP network giving desktop like quality while centralizing the PC resources over much greater distances than similar technologies. Command and control centers have strict security requirements, including the use of multiple computers to access secured and unsecured network runs. Space is constrained in the analysts' work areas, and users require ultra-high uptime to successfully complete their missions.

AirPatrol Corporation offers an end-to-end suite of Wireless Threat Management solutions that enable businesses to keep pace with the expanding requirements of a wireless world. Accurately track and control use of wireless devices whether they be through rogue access points, unauthorized wireless adapter or restricted cellular phones AirPatrol can locate and warn of devices that pose risks to sensitive information and locations with a deployment of WiVision sensors and AirSafe Software. As well as audit wireless signals with WiVisior Mobile Scan.

VMware vCloud delivers a single way to run, manage, and secure your applications where you want them, when you want them. Through VMware's broad ecosystem of leading cloud service providers, you can get VMware Virtualized™ services ranging from on-demand, pay-as-you go infrastructure, to enterprise-class, production ready offerings. Cloud computing is changing the way IT resources are utilized. Users want the ability to access infrastructure resources how and when they choose.

The internationally approved, pioneering range of FlagStone Fully Encrypted Hard Drives offer unparalleled lines of defense against the loss or theft of Data at Rest from any laptop, desktop or tablet computer. FlagStone Technology safeguards data by integrating sophisticated authentication, entire disk encryption and data storage into tamper-proof internal and portable hardware.

The Cruzer Enterprise drives uses mandatory AES 256 bit encryption on all files. Sandisk's CMC management software suite is an extremely robust package allowing for asset management, password policies, and restoring lost drives. CMC also offers auditing for event logs, read/write operations to the Cruzer drive and the ability to remotely disable lost or stolen drives. Sandisk Cruzer Enterprise is certified to FIPS 140-2 and Common Criteria EAL 2.

EDT is the manufacturer of the Dead on Demand digital Shredder. A robust, portable IT appliance that is the most comprehensive tool for decommissioning hard drives. A certifiable audit trail clearly indicates that you retain absolute Care, Custody and Control™ of the process.

McAfee proactively secures systems and networks from known and as yet undiscovered threats worldwide. Home users, businesses, service providers, government agencies, and our partners all trust our unmatched security expertise and have confidence in our comprehensive and proven solutions to effectively block attacks and prevent disruptions.
